# Ready to skill up and join the exciting world of Information and Communications Technology?

## Get a qualification and workplace experience, and earn while you learn!

### Your future starts here, with an ICT traineeship!

Whether you're new to the world of information and communications technology (ICT), or you have experience and want to make a career move into a higher level or specialist field, a traineeship is a great way to skill up!

A traineeship combines formal training for a nationally recognised qualification, with on the job learning through paid employment. It's the perfect way to gain skills, knowledge and experience to set you up for a future career in ICT!

#### What ICT traineeships are available?

Whatever stage you're at, there's a traineeship for you!

- » Certificate III in Information Technology
- » Certificate IV in Information Technology
- » NEW! Certificate IV in Cyber Security
- » NEW! Diploma of Information Technology
- » NEW! Advanced Diploma of Information Technology

Some traineeships may offer the option to select specialist units in areas such as gaming or web development; software and application development; programming; networking; security; systems administration; UX (user experience) design; and database development.

#### Get the edge with employment-based learning

In addition to the formal training you'll do with a TAFE college or accredited training provider, you will also be employed (and paid!) in an ICT related role.

In the workplace, you'll have the opportunity to learn on the job as you work on a range of ICT tasks and projects that utilise and align with the technical skills and knowledge you're gaining through your traineeship qualification.

You'll also be able to build other essential skills including communication, teamwork and problem solving.

This combination of technical skills and knowledge plus real industry experience gives you a strong competitive edge when it comes to getting that job or making a career move.

ICT professionals are needed for jobs across in a range of sectors including media and entertainment; telecommunications; finance; government and public services; military and defence; healthcare; mining and resources; transport – so many options and so many opportunities – get into an ICT traineeship today!
